

Landbased Fish farming, Skagen Salmon

Skagen Salmon is a land based salmon-farm located in Skagen, Denmark. They provide high-quality salmon to the nearby markets with respect of both the salmon, the consumer, and the environment.

The facility relies on a stable operation to ensure optimal environment for the fish. Primozone are proud to contribute to this process as an ozone supplier at Skagen Salmon.

With our modular and adjustable generators our system can in an easy way adapt to the process requirements in order to have the optimum operation.

"At Primozone we supply and install ozone in a easy and safe way, in close cooperation with our clients."

-Jimmie Appelgren,
Area sales manager at Primozone.
